Second list of questions and/or comments on PSD Application  
Hyperion Energy Center

2.22.08

Refer to Section 1.4

- 1) The pollutants VOC and Organic HAP should be speciated so the public can see the types of pollutants by name .
- 2) What is the complete list of metals and TRI if built as designed and all emissions at the expected levels.

Refer to Table 5.2

- 1) Since PM 2.5 is already at 93% of the 24 hr average, what is it if they include all three sources in the baseline?

Refer to Table 6.2

- 1) Where did you obtain the PM 2.5 ppb background level?
- 2) Why was not Port Neal included?
- 3) Will you request thoughts from IDNR on the NAAQS impact?
